LOCAL NEWS

Mr. E. J. Martin, Drumheller, has taken over the Carbon Dairy from Mrs. William Birk.

Acadia Valley and district farmers have penned up their poultry this week. Seems that word got around that "Dusty" Poxon, Jas. Pitt, Len Poxon and Jas. Flaws left Carbon early Monday morning to spend the week hunting geese at the Valley.

Mr. and Mrs. Graham and Jim spent a week recently in Edmonton and district.

A service will be held in Christ Church, Carbon, Sunday, Oct. 7 at 11 a.m. Canon Winter in charge.

C. H. Nash was a Drumheller visitor Tuesday.

Robt. Shaw spent the weekend in Calgary.

I. Guttman was a business visitor this week.

Send in the news! The Chronicle welcomes news items of every description. Correspondents are wanted in the districts surrounding Carbon. Write or call at the Chronicle office for further particulars.

The recently formed Carbon Community Club will sponsor a dance in the Scout Hall Monday, October 15th. See posters for further particulars.

Mr. and Mrs. H. Hunt received word on Tuesday that their son, "Buster" has arrived in Canada and is expected home this week after five years overseas.

Watch for the Rexall One Cent Sale.

Word was received of the arrival in Canada of CFN George Appleyard who is expected in Carbon this week.

Cpl. Ray McMann, RCAF, left Tuesday for Vancouver after a 42 day leave in Carbon.

Mrs. L. Poxon received word that her brother, G. Annear, who has been interned in Germany for the past five years, is now in Scotland where he is receiving medical attention.

Printing of every description at the Chronicle office.

On Sunday, Oct. 7th, preaching service will be at 7.30 in the evening in the Carbon United Church. Following the service there will be a social hour in the annex of the church to which all returned service men and women are invited.

There is a rumor current in Carbon that J. I. Mortimer and A. V. Wallace journeyed to Regina last week. Quite right, and what a trip. Snowbanks almost 8 feet high were to be found along the highways in Saskatchewan. At one place near Gull Lake the story is told of taking a man two hours to dig out his saddle horse. After seeing the snow piled along the road one could easily believe it. However, after almost a week on the road, "Fuzzy" piloted his International into Carbon on Wednesday evening and was able to make a trip to Calgary for the groceries on Thursday.

Secretary's of local clubs and lodges are invited to hand in accounts of their meetings, social activities, etc. Let's make the Chronicle a paper with ALL the news.

Chicago Cubs trounced Detroit Tigers 9-0 in the opening World Series game on Wednesday.

United Church Choir Organize

On Wednesday evening September 26, Carbon United Church Choir held their organization meeting following the regular practice.

The 1945-46 slate of officers are as follows:

Hon. president, Leonard Poxon; president, W. B. Lambert; Sec. Treas., Miss N. Schellek; Librarian Mrs. E. Ritchie; organist, Miss E. Henderson; choir leader Mrs. S. F. Torrance.

Miss D. Tricker Honored

Mrs. D. R. Mackay entered at a dinner and bridge party on Friday evening in honor of Miss Doris Tricker, a bride-elect. Covers were set for twelve.

Honors at cards were won by J. E. Adams and Miss G. Little.

High School Students Organize

The Carbon Students' Union held a meeting on Friday, Sept. 21 to reorganize for the 1945-46 term.

The following officers were elected:

President, Don MacLeod; Vice - President, Don Mann; Sec. Treas., Marilyn Hay.

Entertainment, D. Poxon.

Sports, Don Pattison.

Reporter, Mr. Todd.

Various plans and problems affecting the student body were discussed. It was decided that a dance be put on by the union some time during the latter part of November. (Date still announced later).

Economical Housewives

There was a day when the housewives bought the far-away "bargain" in the belief that it was good business to save a few pennies. But experience taught them a few things. Today's housewives do not buy blindly. They examine the article first and when satisfied with the product they pay a fair price at home. It is economical to make your purchases in

The Uses Of Propaganda

PROPAGANDA HAS BECOME ONE of the most powerful weapons of modern warfare, and it has played a highly important part in the present conflict. Through the clever use of propaganda, Hitler built up his regime in Germany, and spread the legend of Nazi superiority at home and abroad. By the same means, the Germans attempted to break the morale of the Allied armies, and to spread fear and discouragement among the civilian population of all countries who opposed Germany. They used it also in repeated efforts to sow seeds of doubt and distrust among the United Nations. The Allies have likewise made much use of propaganda against both Germany and Japan. The effect of this weapon on the final outcome of the war may never be fully determined, but the extent to which it is used is evidence that it is regarded as a valuable means of attack, and the dissemination of propaganda has become a highly specialized branch of modern warfare.

Is Used Not Only For War

Because of the uses to which propaganda is put in time of war, there is a tendency to associate it only with evil purposes. On the contrary, it is often used to spread helpful and authentic information, and also as a counter-measure against enemy misrepresentations. Indeed, it is used as often to build public morale and to establish confidence between nations, as for destruction. One authority has defined propaganda as "an organized scheme to establish a doctrine or practice." There is need in time of peace, as well as in war, to keep the people constantly aware of certain facts, and an organized scheme to bring to the attention of the public the need for tolerance, understanding, and good citizenship might be a powerful factor in laying the foundation for permanent peace.

Great Need For Re-Education

There are many means by which propaganda is spread. The press and the radio are the two most obvious outlets, but in Germany, Hitler demonstrated the great power of propaganda in the school room. He would doubtless also have used the pulpit for the same purpose had the churches been sympathetic to his doctrine. All these channels have been used in democratic countries to spread the principles upon which national well-being and international security are based; but if the same skill and effort were put into propaganda of this nature, as is put into making it a weapon of war, the effect would doubtless be much greater. More important than this, however, will be the use of propaganda in re-educating the people of Germany and Japan, and in counteracting the deep impression made by those who have sought to destroy everything related to the democratic way of life. It is clear that propaganda is an important weapon of peace, as well as of war.

His Little Speech

Eisenhower Paid Highest Tribute To Fighting Forces Of Britain

The London correspondent of the Ottawa Journal, says: The unanimous decision to confer the honorary award of honor on Gen. Dwight Eisenhower was a foregone conclusion, but never in all its long history has London paid tribute to a more distinguished freeman.

As Allied Supreme Commander in the West, Gen. "Ike" Eisenhower has won immense popularity as well as undying fame. His genius as an organizer, his judgment in selecting a military strategist and his tremendous drive have been associated with a tactful personality, a vision of firmness of command which no many men in history could have equalled.

Curiously enough no paper published the little speech he made on V-night, yet it contained the highest tribute ever paid to the fighting forces of Britain. "I thank God," declared the Supreme Commander, "that we had the British fighting with us."

Conditions Better

Many Things In Britain Indicate A Return To Normal

The New York Herald Tribune says although many war-time restrictions still remain in effect in England, there are indications of a return to peace-time conditions in several fields. The lights, including that over Big Ben, have gone on again. A firm which had been making gas for air-planes and submarines is now producing combs. And the Lech Ness monster has been sighted again.

Still At Work

Expert Team Scientists Captured While Experimenting With New Weapons

A group of German naval experts working on new and secret weapons in a hidden experimental station at Toplitz Lake, high in the Austrian Alps has been captured. The experts are known to have been experimenting with midget submarines among other weapons. Equipment used in experiments was sunk in the 1,000-foot deep lake.

Price Control And Rationing Information

Q.—I am planning on spending my summer vacation at a nearby resort and will be living at the hotel. Is it necessary for me to take along my ration book?

A.—It will not be necessary for you to take your ration book with you if you are staying for less than four weeks. If you plan on being away from the hotel for four weeks, you will turn over one sugar, two preserves and three butter coupons from your ration book.

Q.—When will the next ten extra preserve coupons for canning sugar become valid?

A.—The remaining ten extra preserve coupons to be used for the purchase of sugar for home canning or commercial preserves will become valid July 19.

Q.—I am a farmer and make my own butter for family use only. Is it necessary for me to hand over my butter coupons to the local ration board?

A.—Every farmer who produces butter for home consumption must detach from his own ration book and from those of members of his household, the same number of valid butter coupons which he is selling the butter. These coupons are to be forwarded to the local ration board each month.

Q.—Are landlords allowed to ask for one month's rent in advance when renting an apartment?

A.—No, under the rental regulations landlords are not allowed to ask for more than one month's rent in advance.

Q.—Please send my questions or your request for the pamphlet "Consumers' News" or the Blue Book which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

A Fitting Tribute

French Villagers Honor Canadians On Anniversary Of D-Day

Villagers of Normandy met and gathered at sunrise on June 6 in front of their invasion-struck stone houses to pay simple homage to Canadian soldiers who stormed ashore as Liberators on D-Day.

With heads bowed, the villagers stood on the beach among the twisted hulks of landing craft still lying half-buried in the white sand, and offered a silent prayer for all who brought them freedom from across the grey channel waters. Theirs must have been the most moving of all D-Day anniversary celebrations in France.

Unpretentious as it was, the moment of meditation by humble Normans seemed a more fitting tribute to the memory of our fallen fighting men than all the brass bands and flamboyant speeches.

There was a piano on the beach. Men of a British garrison brought it with them, and accompanied the singing of hymns. Then the crowd walked slowly the 500 yards to the beach, carrying the piano on three tracked vehicles carrying Canadian soldiers.

The common lilac is said to have come from Persia in the 16th century.

Garden Without Soil

Grow Vegetables And Flowers By Using Chemicals

Perfect vegetables and flowers are being grown in England without soil. The new process is the work of a well-known British scientist, S. R. Mullett, the radio valve pioneer.

The plants are grown in concrete single in a concrete tank and are fed only by a nutrient chemical solution which at intervals is pumped from the bottom upwards by a tiny electric motor.

The process demands little labour since a special cut-out device shuts off the current and stops the pump as soon as the tank is sufficiently full.

Mr. Mullett has made an offer to the Ministry of Labour to train suitable ex-service men in the art of soil-less cultivators so that they can in turn become instructors.

Developed In Britain

Washing Machine Has Many Technical Devices Which Are New

A new revolutionary type of electric washing machine, developed in the United Kingdom, will make press-button laundering a possibility for every housewife. The machine applies to laundering the principle of the ship's screw in the form of an impeller device, which is far more efficient than the older agitator device which it replaces. Other new technical devices incorporated are an exceptionally lightweight speed reducer, a neat form of clutch and an automatic, completely foolproof safety device on the attached motor. Starting with about 1,000 machines a week, production will be rapidly stepped up to between 100,000 and 150,000 a year.—St. Thomas Times-Journal.

SMILE AWHILE

Teacher: "Willie, which would you rather have been Shakespeare or Charlie Chaplin?" Willie: "Charlie Chaplin, Miss, 'cause he ain't dead!"

"You called the plaintiff a rogue, a swindler and an ass. Why did you not box his ears into the bargain?" "Well, he is rather hard of hearing."

Matron—"I'd like to get a book. Librarian—Something light or heavy?"

Matron—"Doesn't matter. I have my car outside."

Misses: "I am sorry you are leaving us, Jane. But, of course, if you are going to better your self, I am."

Maid: "Oh, no, Madam. I am going to be married."

Gruff Father (to son): "Why don't you get out and find a job? When I was your age I was working for 48 a week in a shop, and at the end of five years I owned the shop."

Son: "You can't do that nowadays. They have cash registers."

The six-year-old was seated at the breakfast table one morning when, as usual, eggs were served. The little tot surveyed them for a moment and solemnly said: "I wish to goodness hens would lay something besides eggs?"

Jim—"Do you work long hours?" Joe—"No. Only the regulation length—60 minutes each."

Not just for breakfast—but for cereal

These days Kellogg's cereals are more important in our Canadian diet than ever before. They're easy to digest, appetizing anytime. A satisfying main dish for breakfast, a welcome change for lunch, between-meal snacks. Add flavour to left-overs too!

Save Time... Save Work... Save Fuel!

What Can You Spare That They Can Wear

Spare time, as well as spare used clothing, shoes and blankets, is essential to the success of the National Clothing Collection for overseas relief.

In assembling, sorting, and packing the millions of pounds of serviceable used apparel, willing hands are needed in every community headquarters and depot. When you come with your gift of clothing for the suffering and destitute war victims abroad, offer your spare time services to your local committee.

There is a National Clothing Collection receiving depot in your neighbourhood. See that your spare apparel is delivered there.

Warn Motorists of Deadly Monoxide

Deadly dangers of carbon monoxide give cause for fresh warning to motorists at this time of year, according to officials of the Alberta Motor Association.

Recently, there have been reports of death in different parts of the country from these poisonous fumes. In one instance, deaths of two car occupants were reported.

More old cars now are appearing on the highways, due to the abolition of gasoline rationing, that condition probably will prevail for some time, which calls for extra care.

Car experts advise that every car be taken to guard against carbon monoxide. When starting the car in the garage now that colder can be expected, make sure that at least one window is open

to permit the flow of fresh air. Have the car checked over for any defects and poisonous fumes guard against deadly carbon monoxide in every way possible and reduce the death toll.

India is now Canada's third best customer. During the war the value of Indo-Canadian trade increased 19 times.

A GOOD FARMER IS A GOOD PLANNER

It's the man who looks ahead who gets ahead.

GOOD management . . . essential to successful farming, as to any business enterprise . . . is largely a matter of timely marketing and careful spending . . . waiting for the time when it is most favourable to buy.

We all want things now . . . things we have not been able to get for the past several years. Some of these things are necessities . . . some are things that will contribute to our comforts and pleasures.

Eventually, these things will be more plentiful. By waiting a little longer we will help to keep prices of things we need at lower levels and we will buy at better advantage when we do buy.

Meantime we can invest our savings in the safest securities obtainable . . . Victory Bonds. More Victory Bonds will be offered this Fall. They pay 3% interest . . . double bank interest . . . and they are "liquid capital".

If we need cash in an emergency any bank will buy Victory Bonds at any time. And any bank will loan money on Victory Bonds.

The Ninth Victory Loan will be our last opportunity to buy Victory Bonds for a whole year, so buy double this time—the same rate of savings as in previous loans will pay for twice as many bonds over the 12 month period.

FARMERS CAN BUY VICTORY BONDS ON CONVENIENT DEFERRED PAYMENTS THROUGH ANY BANK

... just sign a short form letter which Victory Loan Salesmen carry (banks have copies) ordering the bank to buy Victory Bonds for you. Pay 5% when ordering and the balance at any time during the next 12 months. The interest the bonds earn pays the interest on the bank loan.

NATIONAL WAR FINANCE COMMITTEE

WORLD HAPPENINGS
BRIEFLY TOLD

The one o'clock time gun at Edinburgh Castle, last fired on Sept. 1, 1939, has resumed its daily time signal.

War in Italy caused the destruction of 800 main highway bridges and hundreds of spans on secondary roads.

Russell T. Kelley, chairman of the Red Cross blood donor service in Ontario, said the Canadian Red Cross will need more than 200,000 blood donations annually.

A London Transport bus driver who has not been involved in an accident in 27 years has received a bronze badge, highest award in the national "safe driving" competition.

The King and Queen with Princess Elizabeth and Margaret paid a private visit to Burlington House for a preview of the Royal Academy summer exhibition.

Germany said that 120 feet was blown out of one side of the Tizitiz by 12,000 lb. bomb which sank her in a Norwegian fjord on November 13, 1941. A thousand of the crew perished.

Fleeting ships for use by the Royal Navy in the Pacific war, are being built in South Africa. The first dock, built at Capetown and completed within 13 months, already has been towed to its destination.

A gas model airplane designed by H. V. Faulkner of Vancouver was clocked at 122 miles an hour, a new world record. The previous record held by Williams and Clark of Los Angeles, was 112 miles an hour.

The Netherlands radio announced that the Princess Irene Brigade, small Netherlands force consisting of conscripts in England and volunteers from all over the world, which trained at Stratford, Ont., will be demobilized.

Wings Of Mercy

Plane Comes To Rescue When Lives Of Children Were At Stake

Twice in the same week, Trans-Canada Air Lines was called upon by the Winnipeg General Hospital and in both cases lives of children were at stake. The first was the case of the infant son of Mr. and Mrs. R. F. Yells, of Winnipeg, born with a throat obstruction and in need of immediate operation which could be done only by Montreal specialists.

T.C.A. managed to arrange space for the two-day-old child and a nurse and within a matter of hours the infant was in Montreal and the operation was performed immediately.

Two days later, the same hospital was urgently in need of influenza serum and a telephone call was placed to the Children's Memorial hospital in Montreal. Forty minutes after the telephone call, the serum was placed aboard a T.C.A. plane in Montreal, which was held fifteen minutes behind schedule to receive the shipment, and the serum arrived in Winnipeg eight and one-half hours later.

AN OLD HAND

A woman applying for a job with the telephone company was asked if she'd had any such previous experience. "Oh, yes," she said, "I used to work for a professional strong man—I perforated phone books so he could tear them in half."

Chile's production of iron ore is the largest in Latin America.

LIFE'S LIKE THAT

By Fred Neher

MRS. PIP'S DIARY

"I rationed my husband for two weeks and saved enough to buy a new hat."

A GOOD LESSON The feat that a glass bee will not collect more than a teaspoonful of honey in an entire season indicates that it can be accomplished with a little effort by a great many.

New York city recently received the first carload lot of horseshoe nails shipped into it in more than a century.

THE LONG AND THE SHORT Trans-Canada Air Lines has recently adopted an improved method of ticketing. A single flight coupon for the entire passenger-journey now takes the place of separate coupons to each point on the route. This is accomplished by the arrangement of code designations in small blocks and the use of punches. Time-saving in employee preparation of the new tickets exceeds 75%. Paper costs are reduced by two-thirds. The length of the ticket covering a journey from coast to coast used to measure 2 feet 7 inches, compared with 9 1/2 inches for the new ticket. Holding samples of the old ticket and the new ticket are, left to right—T. W. Kirkham, supervisor of passenger agents; G. T. Featherstone, revenue auditor; and Percy W. Baldwin, auditor.

Counting Its Losses

Score Of Historical Buildings In London Damaged By Bombs

When bombs fell on London, landmarks were destroyed, and now that explosives no longer come from the sky the capital is counting its losses, not in dollars but in history.

Buckingham Palace suffered on three occasions. The private chapel was knocked down. The home in Mayfair where the royal couple lived in the Duke and Duchess of York was flattened.

The Houses of Parliament, unimpaired targets on the Thames, were hit early in the war. In May, 1941, St. Stephen's Hall, where the House of Commons met, was reduced to rubble.

Big Ben was shaken and scarred, but survived to boom out the hour of victory just four years later.

Prime Minister Churchill was sure to Downing street was a priority target. On one occasion as the bombers swept up the Thames he led a newspaperman "they know very well where this house is and they keep trying to get it."

They almost did, too, in 1940-41 and again in 1941.

Kensington Palace, where a young Victoria was raised from bed one dark morning to learn she was Queen of England, is black now from the flames of incendiaries.

The Tower of London, the Royal Mint, the Imperial War Museum, the Law Courts, Old Bailey Court, Lincoln Inn Fields, where the R.C.A.F. had its wartime headquarters, the Royal Museum, where two duds passed through the same hole, and the Royal Albert Hall—were damaged.

Two of the oldest homes in the City were among the first to fall to the blitz. A place in Petteur lane, off Fleet street, built in 1664 and survivor of the Great Fire of 1666, was leveled in 1941. Similarly, the home of Katherine Parr, the wife who outlived Henry VIII, was razed by a fire bomb. It stood at No. 10 Charterhouse square since 1450.

Race Prejudice

Would Not Exist Among Children Without Idea From Adults

An experiment in race relations in a number of recreation camps in the United States showed that race prejudice would not exist among children if parents or other adults did not put such ideas into their minds. White and negro children visited each other's homes, played together on playgrounds, exchanged and shared toys and generally enjoyed themselves together. A clergyman who helped conduct this experiment remarked: "It is only when youngsters grow up and learn from their elders that they acquire the traits and ideas that make for prejudice and ill-will."—Toronto Star.

Uses Of Penicillin

Is Said To Cure Carbuncles And Sore Throat

Sir Alexander Fleming, the discoverer of penicillin, told doctors and surgeons recently that the drug could stop the spread of a carbuncle in two days. He prophesied anyone with a sore throat would just go to a drug store and get a penicillin lozenge and the sore throat would disappear. Enterprising druggists will eventually put a penicillin lipstick on the market. Penicillin is the ideal anti-septic, he said, because it is non-poisonous and because it is impossible to over-dose a patient with it.

John Law, Scottish economist, started the stock exchange.

Vegetables For Britain

Order Received By Canada For Vegetables To Value Of About \$10,000,000

Under the terms of an agreement just completed, the British Ministry of Food will purchase 746,700 bushels of Canadian dried white beans grown in 1945, and additional quantities as may be made available, from the Special Products Board, the Dominion Department of Agriculture has announced.

The British Ministry will also purchase from the Board from the 1945 crop, 4,378 long tons of dehydrated potatoes and 2,250 long tons of dehydrated cabbage, carrots, turnips and beets. The Ministry agrees to purchase an additional 10 per cent. of these products if available. Total value of the beans and dehydrated vegetables is placed at about \$10,000,000.

War Prisoners

U.S. Army Using German Prisoners Of War As Laborers

The United States Army disclosed it plans to train 400,000 German prisoners of war as laborers. When victory came, American armies held 2,852,000 German war prisoners on the Continent. In addition to the 600,000 to be used by the American army, arrangements have been completed for transferring 200,000 to 225,000 American-held prisoners to France for labor. Col. Robert K. Hill of the U.S. Army's Headquarters office disclosed at Allied Supreme Headquarters.

Much Slower Now

But Pig Once Won Race With A Horse In Ireland

Pigs are a lot slower than they used to be. In Ireland, 150 years ago, there was a tall, lean, short-eared breed known as the greyhound pig which could run so fast that few dogs could keep up with it.

The greyhound pig was used by sportsmen to lead the hunt and in 1774 the owner of one of these animals won 60 guineas on a steeple race between his pig and a horse. The pig came in first by a few feet.

AVIATION AGREEMENT

The international civil aviation treaty agreement now in effect with acceptances from 30 nations, four more than the required number, it was learned at Washington, Canada and the United States are among them.

Modern battleships require more than 1,600 electronic tubes each.

Re-Elected President

Association Of Canada

R. M. BROPHY Is Head Of Radio Manufacturers Association Of Canada

R. M. Brophy, president of Rogers Majestic Limited and Rogers Electronic Tubes Limited, was re-elected as president of the Radio Manufacturers Association of Canada. Also re-elected to the vice-presidency was S. L. Capell, vice-president and general manager of Philco Corporation of Canada Limited. W. W. Richardson was re-appointed general manager of the association.

The 16th annual meeting was held in Niagara Falls, Ont. All Canadian radio manufacturers and most of the leading parts manufacturers were in attendance. Mr. Brophy stated that recent surveys indicate the radio industry has the plant facilities and the manpower to start the production of radio receiving sets. At present, Government orders prohibit such manufacturing, but it is hoped they will soon be rescinded. "There will be many difficult problems to overcome before radio sets will appear on the market," said Mr. Brophy. "There are still shortages of raw materials and components; there will have to be a realignment of plant facilities, etc., but I am confident these will be met speedily and efficiently."

A comprehensive survey conducted for the Radio Manufacturers Association of Canada made by Canadian Facts Limited, revealed that 24% of the radio sets are 10 years old or older; 34% are from 5 to 10 years old; 21% are 3 to 4 years old and about 8% have been bought in the past two years.

We had it before... LET'S NOT HAVE IT AGAIN!

The Worst Inflation came after the last war
NOW is the Real Testing time ...

Victory has been won on the battle front—but we must not relax our efforts if we are to continue to avoid the evils of inflation and deflation.

We are rapidly moving towards the day when shortages will be overcome—but reconversion takes time.

The danger of inflation, and its black shadow—deflation—will last as long as goods are not enough to meet demands.

The ending of the war brings the temptation to scramble for things we've been without, and to offer to pay any price to get them.

That's the way inflation gets started.

Inflation with its soaring cost of living is bad enough.

But inflation is always followed by deflation with its falling prices, bankrupt businesses, unemployment and distress.

Deflation would be a calamity that would involve every man, woman and child in Canada.

The only controls that are being maintained are those that aid the production of needed supplies and their speedy and fair distribution to the public, and which prevent an inflationary price rise.

As soon as conditions warrant, these will be dropped.

Until industry gets back to normal production, price ceilings, rationing and some controls are a necessary safeguard for everyone's use.

Keep them working:

IT'S YOUR JOB AND YOUR SAVINGS THAT ARE AT STAKE

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation and unemployment later.

Peace Yet To Be Won

To win back the peace will not be easy, and certainly will take a long time. We have made a start in the right direction, but only a start.

So far we have the blueprints of peace. They won't work themselves either, we have to make them come true. To achieve their intended effect will require the earnest and daily efforts of many people and many nations.

There is, first of all, the reconstruction of a shattered world. We must bind up the wounds of the weary, care for those who have borne the battle, do for his widow and orphan. Only thus shall we find a just and lasting peace.

War's end—was not the end of the fight of Europe. For the homeless and destitute, the hungry and forsaken, the barefoot and naked—the peace is yet to be won.

From October 1st to 20th the Canadian United Allied Relief Fund, on behalf of UNRRA, will put on a national clothing collection. This will be your big chance to really do a bit toward helping 125 million people in Europe and countless millions more in China get through the coming winter without suffering—maybe dying from exposure and cold.

The things most urgently needed are suits, men's, women's and children's. Odd coats, skirts, trousers, dresses, blouses, aprons

overcoats. Jackets in all sizes. Scarves and shawls. Footwear (fastened firmly in pairs). Blankets.

The lot of millions of children is appalling. Feet bundled in old rags and gunny sacks. No shoes. Emaciated bodies in threadbare wrappings.

Their hope for clothing is from this continent. Your attic may hold a 'dead to life' for some child or adult. Your old suit may mean the difference between comfort and suffering to some man who has stood so much already.

The dress you put away when it got too small for you, may lighten the heart of some woman whose comforts are mighty few. That pair of shoes that just did not 'click' with your feet may keep some woman's bare feet from the snow this winter.

Little Sister's outgrown dress and coat would look like a visit straight from Santa Claus to some little girl in Holland. Little Brother's last winter coat would be like a millionaire.

Talk of peace and love and brotherhood won't mean much to a mother who watches her child slowly die for lack of what you can so easily spare. A baby wrapped in paper isn't a joke in Europe. It's a grim reality. Winter won't wait.

Begin now to round up your serviceable used clothing which you can spare without buying new.

Carbon Local A. F. U. Ask \$1.25 Wheat

At a meeting held in Carbon Monday, considerable discussion took place over the attitude of the Dominion Government in offering to guarantee a floor price for wheat of \$1.00 per bushel, basis Fort William. It was felt the government were going to make a floor price for the next five years, that they should set the price at least at \$1.25 per bushel at Fort William, though preferably pay the farmers parity prices and allowing the price to go no lower than \$1.25 as an initial payment at Fort William.

Meanwhile considerable dissatisfaction was expressed at the method of adjustment and payment made to the farmers who were dried out, by the P.F.A.A. Under the present system, a farmer who is dried out in any particular township is very liable to get nothing if the average yield for the township is over 12 bushels to the acre, while his neighbor who may reside in another township may get a 35 bushel crop, yet the average for the township may be under the 12 bushel limit, and therefore this neighbor not only gets a good crop but also receives a hand out from the P.F.A.A. It was therefore decided to urge the district and provincial conventions by means of resolutions to have this method changed to adjustments of individual farms and not individual 36 section lots.

The condition of the weeds on the road north of Carbon to the cemetery was also discussed, and if any readers should care to see the splendid growth of that pest sweet clover, now is the time to do so, for if the snow flies quick and thick, there will be no travel on this road during the winter, and much of the trade for Carbon from the north and east will be diverted to Drumheller. For a dry year, these weeds have done splendidly and look quite pretty in car headlights on a dark night.

The number of Canadian merchant seamen manning Canada's foreign-going merchant ships rose from 1,460 to 8,330 during the war. War took its toll of them, as indicated by the following casualty figures: 1,084 dead or missing and 189 taken prisoner up to March 31, 1945.

During the war Canada has become the leading exporter of base metals. Of the combined output of the United Nations, Canada contributed 94 per cent of the nickel, 79 per cent of the asbestos and 32 per cent of the aluminum produced.

To donors and others who have contributed in any way to the

RED CROSS WARTIME BLOOD DONOR Service

in Alberta Division Clinics:

Dear Friends:

This letter is to say "THANK YOU!"

The volunteer Blood Donor Service of the Canadian Red Cross Society was established on January 29, 1940. Since that time, we have received over 2,300,000 blood donations in Canada. As we are now closing the service from a war standpoint, we would like to extend to you our sincere appreciation for the blood donations you have so generously given.

There is always a joy in doing something for another but there is a special joy when it means the saving of a life. This service has been the means of saving the lives of hundreds of our men in the Army, the Navy and the Air Force; so you, by your co-operation, have had a part in it. We know this thought will fully repay you.

Now regarding the future. It is most unfortunate that many deaths occur in the hospitals in Canada annually because of the lack of a proper transfusion service. The Red Cross is an organization of mercy and we are now surveying the field in Canada with a view of setting up a service to provide blood for transfusion purposes in all hospitals.

It is anticipated that it will take at least three months to complete the survey; so we again say "Thank you!" for your assistance during the war period and we most earnestly request that you join with us when the new service is established in continuing to play a part in the saving of human life—something so dear to us all.

Yours sincerely,

D. A. & RILEY,
Chairman, Blood Donor Committee.
